MySQL, T-SQL  
REST, SOA  
Drupal

## IDEs

Visual Studio  
PHPStorm

## Graphics

Adobe Illustrator  
Adobe InDesign  
Adobe Photoshop  
Adobe Lightroom

## profile

A developer with master degree in information technology and experience with back-end programming from corporate as well as small business environment. I worked in on development of SOA application with REST based services. I enriched my theoretical knowledge while writing thesis on REST services and their versioning. I have excellent communication skills and I pay attention to detail. In a small agency I developed websites based on Drupal CMS. I improved analysis skills, discipline and time management as I usually worked from abroad. My professional goal is to become a full stack developer with good technical skill set and theoretical overview.

## experience

- July 2015 — now **Proof & Reason s.r.o.** Brno, Czech Republic  
 UX focused digital agency  
**Freelance software developer**  
 Drupal  
 Implementation of several projects. I was responsible for project analysis, TWIG template implementation and site building according to supplied graphic design.
- September 2014 — June 2015 **FNZ Ltd. - Czech branch** Brno, Czech Republic  
 Provides financial investment platforms to financial institutions  
**Software developer**  
 C#, VB, SOA, REST, Visual Studio, Jira  
 of wealth management web application, my part of service layer designed according to REST service layer development and maintenance for financial investment system. I worked in an international team of roughly ten people, co-operating on daily basis with MVC team, core functionality teams.
- August 2014 **FNZ Ltd. - Czech branch** Brno, Czech Republic  
 Provides financial investment platforms to financial institutions  
**Summer internship**  
 C#, JavaScript, Razor, MVC, Visual Studio  
 Development of an internal MVC application. In a team of four we developed an employee holiday planner. According to proposed design we created entities, controllers and views.
- 2012 — 2014 **various customers**  
**Freelance graphic designer**  
 Adobe Illustrator, Adobe InDesign, Adobe Photoshop  
 During my studies I was working on several small graphic projects. Mostly logo design and branding but also book covers, pages design and layouts and mobile application graphic design. My bachelor thesis was on Visual identity for a real customer. I designed logo, promotional items and provided graphic manual.

## education

- 2012–2015 **Master** Service Science, Management and Engineering Masaryk University, Brno  
*Specialization in project management and SOA.*  
 Thesis in SOA, REST services versioning. I analysed REST services of an existing company and proposed options for their versioning. Main goal was to offer and maintain custom tailored functionality for various customers.
- 2009–2012 **Bachelor** Applied Informatics Masaryk University, Brno  
*General information technology programme, with voluntary specialization in graphic design.*  
 Thesis in Visual identity for an educational project. The thesis covered whole process of creating a logo and unified visual identity for real life customer.
